

Content publishing instructions - TB2

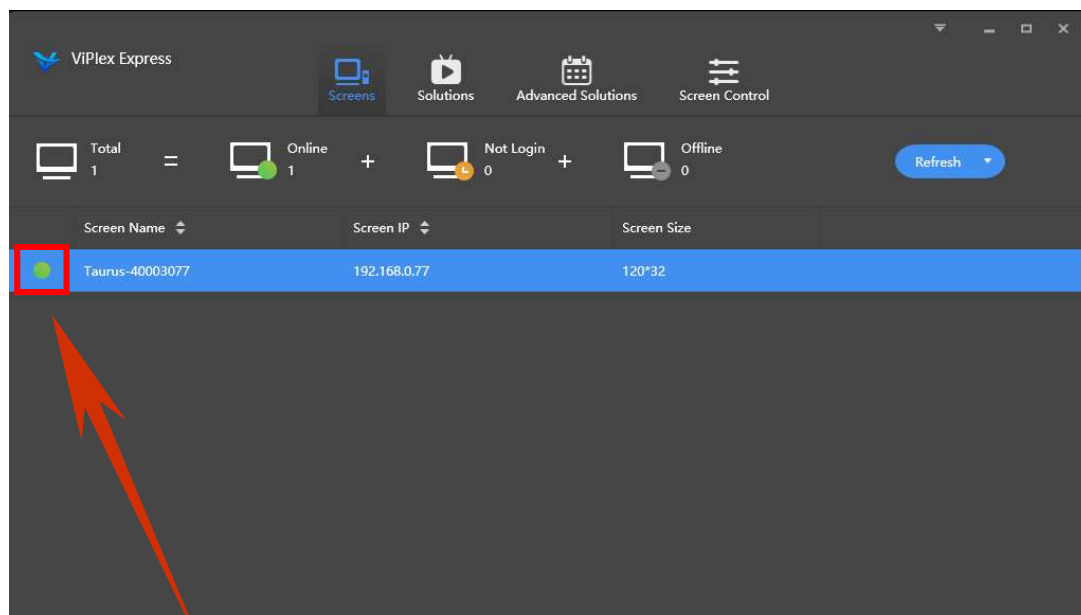

I Connect the screen with TB2 controller on “LED OUT” port with ethernet cable. And connect the TB2 with computer with ethernet cable.

II Install “ViPlex Express” software from following link of NovaStar website:

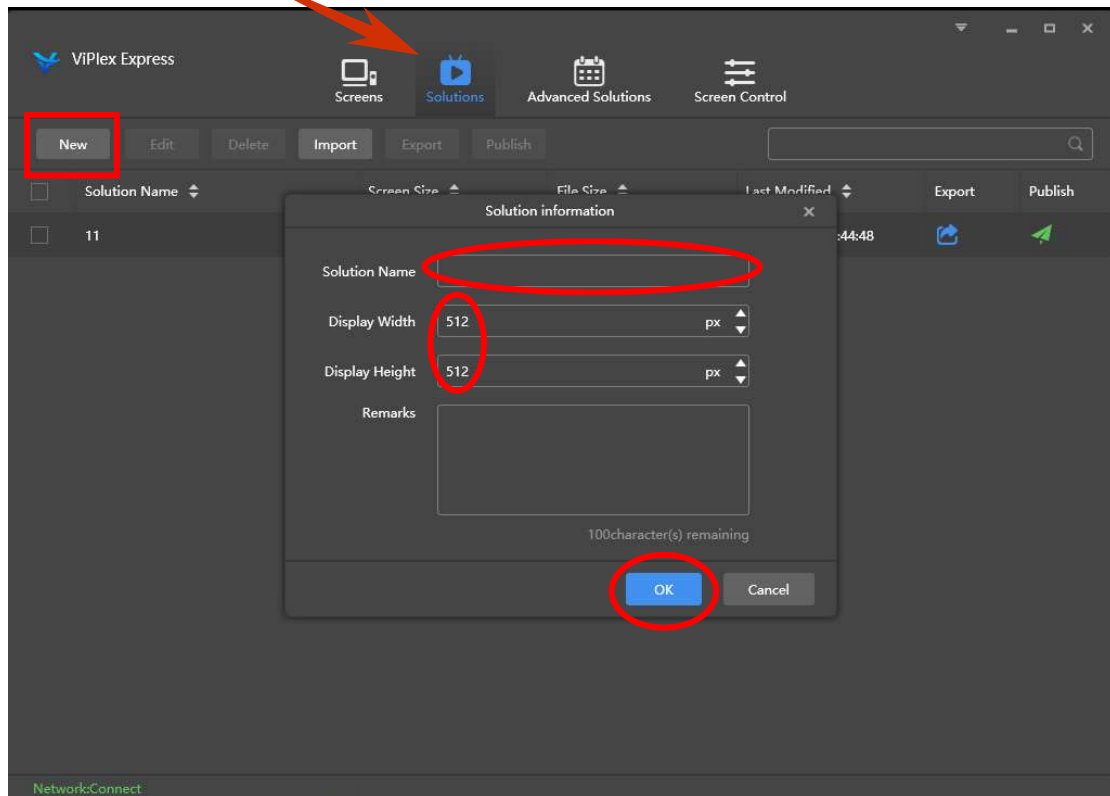

http://www.novastar-led.com/product_detail.php?id=500&cid=402&pid=28

III Open the software. The interface is as the picture below:

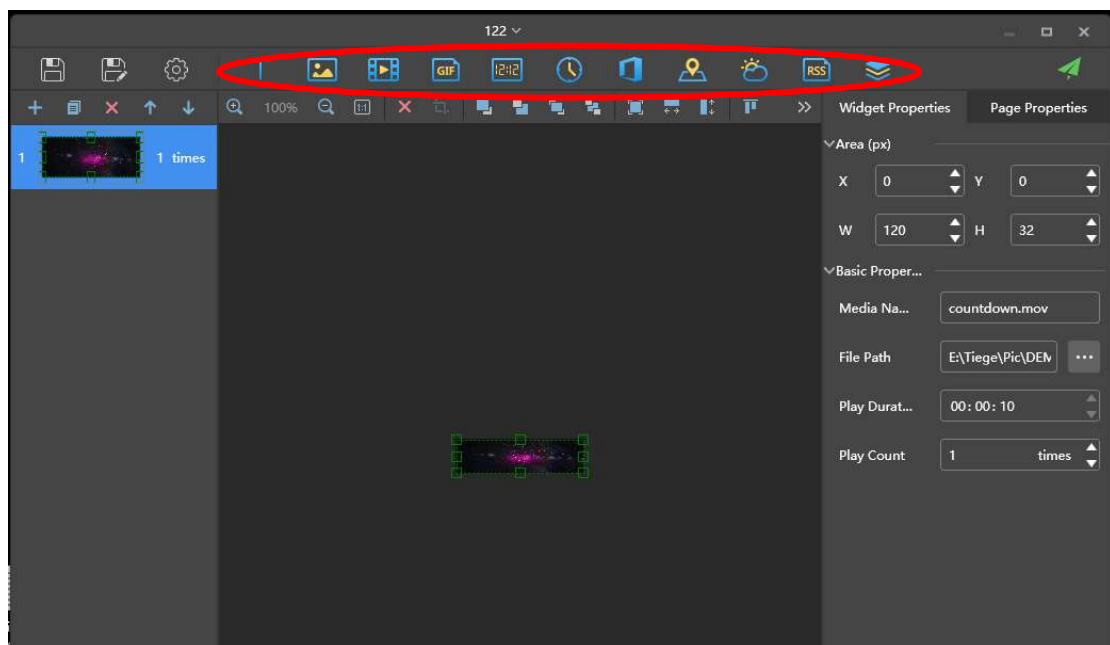

Note: The green dot means the system is successfully connected.

IV Click “Solutions”, then click “New”. A window will open as the picture below:

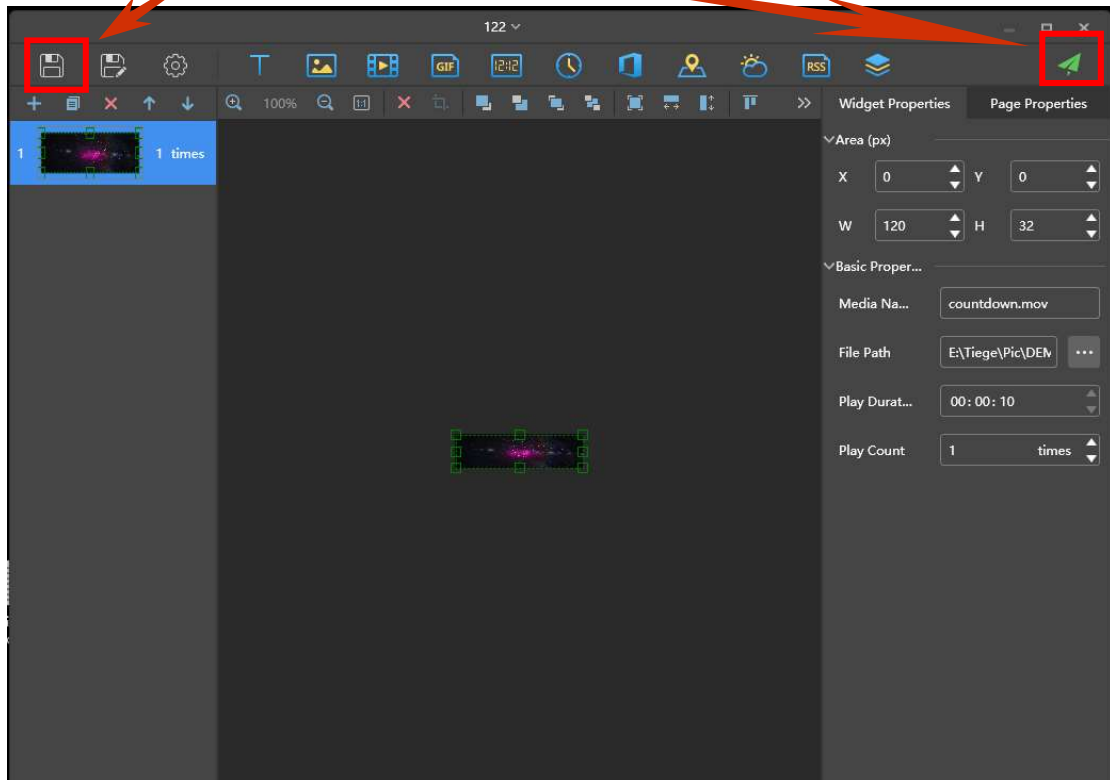

Fill in the “Solution Name”. Then set the “Display Width” and “Display Height”. (The Display Width and Height are according to the screen pixel pitch and size you have. For P6 - 4pcs demo kit, the Display Width is 120 and Display Height is 64.) Then click “Ok” to finish the settings.

V After the settings above, a new window will open. You can add pictures, videos, words and so on from the options below:

VI Then click “save” and “publish” to publish the content:

VII Content is successfully published as the picture below:
